

GALTEE ENGINEERING (Perth) OCCUPATIONAL HEALTH & SAFETY POLICY

Galtee Engineering (Perth) P/L is a privately owned and operated Mechanical Engineering & construction company servicing Australian and International clients since 2005.

In accordance with our overall vision and mission objectives, Galtee Engineering's goal is to create and sustain a workplace free from accident, illness and injury. To achieve this, our aim is to implement effective and industry leading safety & health management systems that emphasize and promote a continual improvement philosophy.

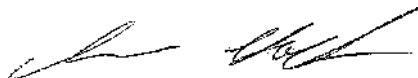

Part of any safety and health system relies on transparent, accurate and open information and communication with employees. Galtee Engineering ensures that employees are involved in all aspects of the Safety Management System and that all documentation is made readily available and communicated to employees on an on-going basis.

Compliance with Western Australian legislative requirements (Occupational Safety and Health Act 1984 and Regulations 1996) is a critical component in all of Galtee Engineering's safety systems and work processes. In addition, Galtee Engineering's aim is to exceed regulatory requirements where practicable by adopting interstate processes that surpass state law and observing guidance material such as Australian Standards and Code's of Practice.

Galtee Engineering ensures that the necessary personnel and resources are made available as deemed practicable in ensuring the commitment to this policy.

The Operations Manager accepts ultimate responsibility for this policy, its implementation and monitoring. The Manager has also been appointed the responsibility for the ongoing development and maintenance of the management systems. All members of management are responsible for the implementation and monitoring of the policies and procedures contained within the Safety Management System for their area of authority/responsibility. Employees engaged by Galtee Engineering are held accountable for their individual actions and decisions relating to workplace Safety and Health.

Chris Holt
Operations Manager
